PERSONAL STATEMENT

My name is Wen and I am a Web Developer with experience in Javascript, React, and the MEAN stack. I am enthusiastic about new technology which has led me to become a web developer. My journey began by taking a few online programming courses and has since ignited my passion for the field which led me to General Assembly's Web Immersion Program. Ever since I have been driven to continuously learn and refine my skills. I now plan to apply my talents and passion to a Web Developer position.

SKILLS AND STRENGTHS

Primary language:	JavaScript, Python, HTML, CSS
Libraries & Frameworks:	React, Angular, jQuery, Node, Express, Flask, Django, Mongoose
Build Tools:	Bootstrap, Materialize, Gulp, Sass, Webpack, Flexbox
Database:	MongoDB, PostgreSQL, SQL
Other Related Skills:	API, GraphQL, Agile Development, SCRUM, Github Workflow, Wireframing
Foreign Languages:	Proficient in Mandarin

PROJECTS

REACT-CHATROOMS: A react messaging app that allows users to sign in with a username and specify a chatroom to chat live with others connected to the app. Socket.IO is used to provide real time messaging.
Technologies used: React | Socket.io | Javascript | Node

RESTAURANT REVIEWS: A progressive web app used to CRUD reviews from a node/sails.js api server. Utilizes service workers, cachedb and indexedb to provide an offline experience.
Technologies used: Service workers | Javascript | CSS | Gulp | IndexedDB | CacheDB | API

CASEGALAXY: An E-commerce app that allows users to make purchases through Paypal from a list of items. The app takes in Paypal API and allows users to CRUD listings with AJAX calls to the Mongo database.
Technologies used: MEAN Stack | JSON Web Tokens | HTML | CSS | Gulp | Angular | Javascript

ECOMMERCE-DJ: An ebay like app built with Django and Python. Allows users to sign in and register with Django and sqlite. Users are able to comment, like, create and delete posts for listings.
Technologies used: Django | Python | SqlLite | Bootstrap

WORK EXPERIENCE
